Renewi plc

Press Release

ATM facility acquires adjacent land for strategic expansion in the Netherlands

Renewi plc (“Renewi”) is pleased to announce that ATM has acquired land and waterfront access adjacent to its current facility in order to enable future strategic expansion.

ATM is the soil and waste water treatment facility in Renewi’s Hazardous Waste Division and is located in Moerdijk, in the Netherlands. The facility is one of the largest of its kind in Europe and the largest operation within Renewi. It helps to protect the environment from contamination by converting around two million tons of hazardous waste per annum back into clean products for reuse. The current ATM site has been fully utilised for some time and so the acquisition of the adjacent land, for an undisclosed sum, will open up possibilities for strategic expansion in line with Renewi’s stated growth strategy.

The site was acquired through the acquisition of Martens en Van Oord Moerdijk B.V. from the seller, Martens en Van Oord Holding B.V. The newly acquired 70,000m² site comprises a waterside quay and warehousing and operates under a long-term leasehold from the Dutch authorities.

Jonny Kappen, Managing Director of Renewi’s Hazardous Waste Division said:

“We are delighted to have acquired the land adjacent to ATM which will open up possibilities for expansion in line with our strategy to drive growth through increasing treatment capacity and technology. We now look forward to the opportunities which the acquisition will bring for our customers and our people.”

About Renewi plc

Renewi, created in 2017 by the merger of Shanks Group plc and Van Gansewinkel Groep B.V., is a leading waste-to-product business ideally positioned to be part of the solution to some of the main environmental problems facing society today: reducing waste, avoiding pollution, and preventing the unnecessary use of finite natural resources.

We are listed on the London Stock Exchange and are a constituent of the FTSE250 index. With over 8,000 employees in Europe and North America, we have deep expertise and an extensive breadth of waste management products and services.

For us, waste is a state of mind, an opportunity. When we take away someone's waste, we then give it new life. We transform a wide range of used materials into useful products and raw materials for our customers, like recycled paper, metal, plastic and glass, woodchips, compost, energy, fuel, and other products.

In the process we protect the world from contamination, preserve finite natural resources, and enable customers to meet their sustainability goals. With our deep international expertise we also provide our customers with an extensive product range, combined with local service and attention.

Above all, our team is committed and passionate about our mission: waste no more. Renewi operates across five divisions:

- Netherlands Commercial – Collecting, sorting, treating and recycling commercial and household waste in the Netherlands
- Belgium Commercial – Collecting, sorting, treating and recycling commercial and household waste in Belgium
- Hazardous Waste – Treating soil, water and packed chemical waste at our flagship ATM facility and conducting specialist industrial cleaning in the Netherlands
- Monostreams – Managing a range of waste streams which focus on specific end markets such as glass, electronic goods, organics and minerals in Europe
- Municipal – Operating long-term waste management contracts with local authorities in the UK and Canada
