## Renewi plc

Press Release

---

# **Renewi 100<sup>th</sup> truck takes to the road**

International waste-to-product company, Renewi plc, announces that its 100<sup>th</sup> truck has taken to the road in the Netherlands.

The completion of Renewi's 100<sup>th</sup> freshly branded truck marks a significant milestone in Renewi's rebranding project, following the merger of Shanks and Van Gansewinkel earlier in the year. The integration of both strong legacy companies is progressing very well and will deliver target annualised €40m cost synergies to be delivered in financial year 2019/20, with an initial €12m to be delivered this year. Building the new Renewi brand is another important part of the company's integration plans.

Renewi has a fleet of over 2,500 vehicles in the Benelux. These vehicles will all be rebranded or replaced in the coming years in line with the company's carefully planned capital replacement programme. As part of the integration, Renewi is also rolling-out an upgraded and more efficient truck fleet.

### **Peter Dilnot, CEO at Renewi said:**

*"It is exciting to see our Renewi brand coming to life with the first 100 trucks now rebranded. Our Renewi brand represents our waste-to-product business model and our role at the centre of the circular economy. We are now looking forward to rolling out the next phase of truck rebranding in the coming months, as well as changing signage and other items across our estate."*

## About Renewi plc

Renewi, created in 2017 by the merger of Shanks Group plc and Van Gansewinkel Groep B.V., is a leading waste-to-product business ideally positioned to be part of the solution to some of the main environmental problems facing society today: reducing waste, avoiding pollution, and preventing the unnecessary use of finite natural resources. With over 8,000 employees across nine countries in Europe and North America, we have deep expertise and an extensive breadth of waste management products and services.

For us, waste is a state of mind, an opportunity. When we take away someone's waste we then give it new life. We transform a wide range of used materials into useful products and raw materials for our customers, like recycled paper, metal, plastic and glass, woodchips, compost, energy, fuel, and other products.

In the process we protect the world from contamination, preserve finite natural resources, and enable customers to meet their sustainability goals. With our deep international expertise we also provide them with an extensive product range, combined with local service and attention.

Above all, our team is committed and passionate about our mission: waste no more.
