Renewi secures long-term extension for specialist Maasvlakte landfill site in the Netherlands

Renewi plc (LSE: RWI) has secured a long-term extension for its specialist Maasvlakte landfill site in the Netherlands which will secure this necessary outlet for the next 20 years.

The site is operated by Renewi's Mineralz business, which is part of its Monostreams Division. It is completely unique as it is the only dedicated 'class 1' landfill in the Netherlands for the disposal of hazardous materials. It offers safe and unique immobilisation and storage for materials such as fly ashes and low level NORM waste. This means that the site treats and safely disposes of materials that other outlets cannot, therefore making it an essential partner to the energy from waste sector and other industries.

As there are few other disposal options for hazardous materials, input volumes are increasing, particularly in highly leaching hazardous waste. The current site holds 4.5 million m³ of this specialist waste.

In the Netherlands there is established policy and legislation to ensure that only waste streams which cannot be recycled or incinerated are sent to landfill. Renewi is also well placed to recycle and recover non-hazardous waste to increase diversion from landfill.

Bas Blom, Managing Director of Renewi's Monostreams Division said:

"We treat highly hazardous end-of-life materials which cannot be recycled to ensure they are treated and disposed of in a safe manner. We are delighted to have secured this extension and be able to continue this important work over the next 20 years. In addition to providing a necessary outlet for these end-of-life materials, the extension will preserve ongoing profitability within the Monostreams Division for the long term while simultaneously postponing landfill aftercare costs at the site."

About Renewi

Renewi is a leading waste to product company that gives new life to used materials every day. We have more than 8,000 employees working at 200 sites across Europe and North America. Our extensive operational network means we are always close to our customers.

For Renewi, waste is a state of mind, and an opportunity. Our many years of knowledge and experience, combined with a broad range of services, allow us to offer sustainable, practical recycling solutions. We use innovation and the latest technology to turn waste into useful materials such as paper, metal, plastic, glass, wood, building materials, compost and energy. In other words, we turn today's waste into tomorrow's raw materials.

The result of our work is less waste and contamination, a smarter use of scarce raw materials, and a reduction in carbon emissions. This means that we are contributing towards a cleaner, circular world in which we "waste no more".

Renewi was created in 2017, following the merger of Shanks Group plc with Van Gansewinkel Groep BV, and is listed on the London Stock Exchange. Visit our website for more information: www.renewiplc.com. Images are available at www.renewiplc.com/imagelibrary.
