### Renewi scoops prestigious safety award for second time

International waste-to-product company, Renewi plc (LSE: RWI) has won the prestigious CASOS Golden Best Practice safety award for the second time through its Reym industrial cleaning business.

Reym's highly experienced and trained cleaning teams use specialist equipment to deliver a reliable, cost-effective and above all safe cleaning process in a market where the cost of safety and quality is of paramount importance.

The CASOS Golden Best Practice award is given to the most innovative solution that contributes to a safer working environment for NAM operations. Reym's 'Non-man entry system' won the award, which prevents its people having to enter tanks whilst industrial cleaning. The system has already achieved a reduction of people having to enter tanks of 85%.

**Jonny Kappen, Managing Director of Renewi's Hazardous Waste Division said:**

*"We are delighted to win this prestigious safety award for the second time, particularly as it focuses on innovation and our customer both of which are fully aligned with our vision. The CASOS awards promote the sharing of safety solutions between contractors - an objective that we wholeheartedly endorse. We are proud of this team effort and look forward to continuing to develop innovation and solutions that improve safety."*

#### **About Renewi**

Renewi, created in 2017 by the merger of Shanks Group plc and Van Gansewinkel Groep B.V., is a leading waste-to-product business ideally positioned to be part of the solution to some of the main environmental problems facing society today: reducing waste, avoiding pollution, and preventing the unnecessary use of finite natural resources.

We are listed on the London Stock Exchange and are a constituent of the FTSE250 index. With over 8,000 employees in Europe and North America, we have deep expertise and an extensive breadth of waste management products and services.

For us, waste is a state of mind, an opportunity. When we take away someone's waste, we then give it new life. We transform a wide range of used materials into useful products and raw materials for our customers, like recycled paper, metal, plastic and glass, woodchips, compost, energy, fuel, and other products.

In the process we protect the world from contamination, preserve finite natural resources, and enable customers to meet their sustainability goals. With our deep international expertise we also provide our customers with an extensive product range, combined with local service and attention.

Above all, our team is committed and passionate about our mission: waste no more. Renewi operates across five divisions:

- Netherlands Commercial – Collecting, sorting, treating and recycling commercial and household waste in the Netherlands
- Belgium Commercial – Collecting, sorting, treating and recycling commercial and household waste in Belgium
- Hazardous Waste – Treating soil, water and packed chemical waste at our flagship ATM facility and conducting specialist industrial cleaning in the Netherlands
- Monostreams – Managing a range of waste streams which focus on specific end markets such as glass, electronic goods, organics and minerals in Europe
- Municipal – Operating long-term waste management contracts with local authorities in the UK and Canada
