Date: 21 January 2019

Renewi introduces innovative circular bins

International waste-to-product company, Renewi plc (LSE: RWI) is introducing innovative circular bins in the Netherlands.

The circular bins will be made from plastics that have been collected and recycled by Renewi, giving a new life to these useful materials. Some of the material also originates from old Renewi containers which are no longer suitable for use. The concept will apply to Renewi's "rolling bins" in the Netherlands. Going forward, any new types of these containers deployed for collection will be completely circular.

Renewi will deliver the plastics to plastics processing specialist, KRN who convert it to plastic recyclate. The plastic recyclate will then be used by manufacturers, ESO and Sulo to produce the new circular rolling bins. Working together, the companies developed the production process to enable the production of the correct specification and colour of Renewi containers.

Otto de Bont, Managing Director of Renewi's Commercial Waste Netherlands Division said:

"As a leading waste-to-product company, we think it's important that our own activities are sustainable. The circular rolling bin is a good example of this. We are showing that we practice what we preach and at the same time we are showing that a good collaboration in the chain can give great results. That's something we're extremely proud of."

About Renewi

Renewi is a leading waste to product company that gives new life to used materials every day. We have more than 8,000 employees working at 200 sites across Europe and North America. Our extensive operational network means we are always close to our customers.

For Renewi, waste is a state of mind, and an opportunity. Our many years of knowledge and experience, combined with a broad range of services, allow us to offer sustainable, practical recycling solutions. We use innovation and the latest technology to turn waste into useful materials such as paper, metal, plastic, glass, wood, building materials, compost and energy.

In other words, we turn today's waste into tomorrow's raw materials.

The result of our work is less waste and contamination, a smarter use of scarce raw materials, and a reduction in carbon emissions. This means that we are contributing towards a cleaner, circular world in which we "waste no more".

Renewi was created in 2017, following the merger of Shanks Group plc with Van Gansewinkel Groep BV, and is listed on the London Stock Exchange. Visit our website for more information: www.renewiplc.com. Images are available at www.renewiplc.com/imagelibrary.
