Paste sludge, can be tipped out

EURAL code	**080113* - 080111***
Waste code	**015074**

DESCRIPTION

Paste sludge, such as paint sludge in containers of a minimum capacity of 60 litres, which can be tipped out.

ADDITIONAL CONDITIONS

Parameters:

- Flashpoint: > -10°C
- Free water: < 20%
- pH: 4-14
- Chlorine: < 0.5%
- PCB: < 50 ppm
- Mercury: < 5 ppm
- Sulphur: < 10%
- Heavy metals: limited

General conditions:

- No micro-dust or powdery waste
- No substances that cause strong odour nuisance (such as amines, amides, butyric acid, mercaptans and styrene)
- No lachrymatory products
- No waste that may form explosive mixtures or toxic fumes or cause polymerisation on incineration or due to interaction
- No highly toxic products
- No highly corrosive products
- No spray cans or pressure receptacles
- No free cyanides or isocyanates
- No non-polymerised silicones
- No solid metal parts (> 5 mm thickness)
- No non-crushable objects
- No ceramic or metal balls
- No glass

Packaging conditions:

- Packaging must be able to be emptied by gravity
- The waste product must be solidified and able to be completely emptied by upturning
